Security Scorecard established a partnership with Proactive Risk to accelerate NYDFS testing requirements.

October 4th, 2018

New York, New York, October 4th, 2018 – Today SecurityScorecard has announced a strategic partnership with Proactive Risk Inc, a software as a service (SaaS) provider for collaborative security testing. The PENTESTON® workbench helps organizations meet requirements under New York State, Department of Financial Service 23 NYCRR 500.

The NYDFS Cybersecurity Regulation requires New York insurance companies, banks, and other regulated financial services institutions—including agencies and branches of non-US banks licensed in the state of New York—to assess their cybersecurity risk profile. The NYDFS Cybersecurity regulation is designed to protect consumers and to "ensure the safety and soundness of the institution," as well as New York State's financial services industry. This is particularly relevant for requirements 500.02(Cyber Security Program), 500.03(Cyber Security Policy), 500.05(Penetration Testing and Vulnerability Assessment), 500.09 (Cyber Security Risk Assessment).

"The integration with Proactive Risk's new workbench PENTESTON® helps our compliance-focused customers meet and exceed the NYDFS requirements of 500.05 with an active penetration testing workbench" - Alex Heid, Chief Research and Design Officer, Security Scorecard

As an integrated partner with Security Scorecard we help clients meet the 500.2, 500.3 and 500.9 requirements. Our integrated solution improves cyber risk scoring and security testing workflows. " - Tom Brennan, CEO, Proactive Risk

To educate affected organizations about the benefits of Security Scorecard and PENTESTON® solution, we are hosting a collaborative to educate companies on how they can cyber hygiene and third party vendor risk management with Security Scorecard

Date: October 10, 2018 12:00pm - 1:00pm EDT

About Security Scorecard

Headquartered in the heart of New York City, Security Scorecard's vision is to create a new language for measuring and communicating security risk. The company was founded in late 2013 by Dr. Aleksandr Yampolskiy and Sam Kassoumeh, two former cybersecurity practitioners who had served, respectively, as Chief Information Security Officer and Head of Security and Compliance. With cloud solutions becoming an increasingly integral part of the security technology stack, Yampolskiy and Kassoumeh recognized the need to address third- and fourth-party risk as well as better understand the security capabilities of their business partners. Since its founding, the company has grown dramatically and now counts hundreds of leading brands as customers. SecurityScorecard is backed by leading venture capital investors including Sequoia Capital, GV, and NGP Capital among others. For more information, visit securityscorecard.com.
